

BASIC UNIT 6 SCENARIO (B)

PENDING REQUEST

Once you are logged on to ROSS, check Personal Settings under the Administration menu, Pending Request Filters tab to view Selected Dispatch Units. This will show you the Dispatch Center you are in (Local), Dispatch Centers you can order directly from (Selection Area or Child), and the GACC you place orders up to (Parent). You can also view your Selected Host Units here.

Complete each of the following actions:

Pending Request screen.

1. Fill the **Creek** Requests for a **FOBS** and a **Type 4 Engine** with local resources on the **Available** tab. For the Engine, click the **Fill with Single Resource** option. For both requests, click the travel option **No Travel Documented (Set At Incident)** and pick an appropriate Assigning Contact.
2. Place the **Juniper** Incident **Type 3 Helicopter** request with a dispatch center within your Selection Area (**Other Resources** Tab).
3. Fill the **Juniper** Incident **Type 4 Engine** request by reassigning the **Type 4 Engine** from the **Creek** Incident (the engine filled above will be on the **At Incident** tab). The engine will arrive on scene in less than 30 minutes. Click an appropriate travel option.
4. Fill the **Juniper** Incident **FOBS** request by reassigning the **FOBS** on the **Creek** Incident (**At Incident** tab) and click the travel option **Set Travel to be Arranged**.
5. Fill the **Juniper** Incident **ENGB** request with one of your own resources (**Available** tab). Click the travel option **No Travel Documented (Set At Incident)**.
6. On the **Juniper** Incident, place one **Type 3 Engine**, the **EQTR**, the **EDSP** (Supervisory Dispatcher), both **FALCs**, and the **Type 1 Crew** requests with a dispatch center within your Selection Area (**Other Resources** tab).
7. Fill the **Juniper** Incident **EDSD** (Support Dispatcher) request with the Named Request (note the * in the NR column). To see the name, select **EDSD**, click **View**, **View Request**, and the **Named Request** tab, or click the **Named Request** option button. Use the **Set Travel to be Arranged** option.
8. Place up two of the **Type 3 Engines** on the **Juniper** Incident.

9. Search for any Pending Requests from your **Selection Area** and fill from your Available tab.
 - Fill the **Sage Incident Type 1 Airtanker**. For travel use **Set Travel ATD/ETE**. Set the ATD (Actual Time of Departure) right now and give the airtanker 30 minutes en route.
 - Fill the **Sage Incident Type 2 Crew (Fill with Single Resource)** and the **PTRC**. Click **Set Travel to be Arranged** as the travel option for both.
 - Fill the **Sage Incident Type 6 Engine (Fill with Single Resource)**. Using **Set Travel ETD/ETA**, have the engine leave now and arrive in 2 hours.
 - **UTF** (Unable to Fill) the **Sage Incident EDSP** and both **FALC** requests, even though you may have some available resources.
10. Fill the **Juniper Incident Type 5 Engine** request by using **Fill with Agreement**. The format for **Resource Name** is: **ENGINE** – (That's ENGINE all in capital letters, space, dash, space, and then the name. You are on your own now for the name – get creative!) For the Provider, see the **Hint** below. Use any travel option.

HINT: When a Provider is required, after clicking the **Pick Provider** drop-down arrow, fill in the **Unit ID** field with the letters that begin all your incidents. (For example, if you have an **NM-ABD-000001** Incident, then your Provider is **NM-ABD**).
11. Fill the **Juniper Incident Request for Service - Porta Potties/Service** with your local vendor on the **Contracts/Agreements** tab. ETD tomorrow at 0600 plus 2 hours en route.
12. Fill the **Juniper Incident Service – Meals** for sack lunches with Billy Bob's, also on the **Contracts/Agreements** tab. We won't track the lunches so no travel is needed.
13. On the **Juniper Incident Cancel UTF the EDSP** (you may need to wait for your partner to UTF this back to you).
14. Cancel one of the **FFT2** requests on the **Juniper**.
15. Still on the **Juniper** change one of the **FFT2** requests by editing the catalog item to **Firefighter, Type 1 (FFT1)**.
16. Now fill one of the **FFT2** positions on the **Juniper** with the **Fill with EFF/AD** option. Make up a name (Janis Joplin, Eric Clapton, etc.) and then click **Pick Provider**. Select any travel option.
17. Next, fill an **FFT2** position on the **Juniper** with someone from the **Available** tab. For travel click **No Travel Documented (Set At Incident)**.
18. The **Creek Incident** calls needing an **FFT2** sometime tomorrow. From the **At Incident** tab, reassign the **FFT2** you just filled above. Use **Set Travel ETD/ETA** as the travel option. Begin travel now and set the ETA 24 hours from now.
