BUYING TEAM LEADER	BUYL	1
BASE CAMP MANAGER	BCMG	1

Description

The Pre-Orders module is used to create the pre-established groupings of catalog items and their quantities needed. The pre-order function is used in conjunction with an Incident Management Team so they can “hit the ground running” upon arrival to an incident. The pre-order function can also be used to group resources such as Strike Teams, aircraft resources, and initial attack resources, which is more efficient than creating each resource request individually.

This module is closely related to the New Request and Pending Request modules.

ROSS Module Summary

Pre-Orders

Data Information

Data Element	Data Definition
Pre-Order Name	Name of your choice. <i>Required field.</i>
Purpose	Pertinent information about Pre-Order.
Available Nationally <i>check box</i>	Allows the pre-order to be used nationally by others.
Pre-Order Contents	Catalog items from the Pre-Order are added or removed.
Catalog <i>tab</i>	The primary selection data for resources. These include Aircraft, Crews, Equipment, Overhead, and Supplies.
Category	The various sub-groups within a catalog (e.g., Fixed Wing, Helicopter).
Catalog Item	The various items within a catalog category (e.g., Helicopter → Type 3 Standard).
Filter <i>tab</i>	Allows for quick filter of resource item by Catalog, Category, Catalog Item and item name, code or keyword.
Organizations <i>tab</i>	Only applies to locally available Pre-Orders and allows the specification of organizations that have access to it.
Pre-Order Name	Name of your choice. <i>Required field.</i>
